Portable pH Meter

PH-W2

Description

This pH meter is ideal for aquariums, aquaculture, fish hatcheries, food processing, laboratories, paper industry, swimming pools, schools and universities.

Features

High-sensitivity glass probe

Special material glass electrode probe, accurate and fast signal transmission.

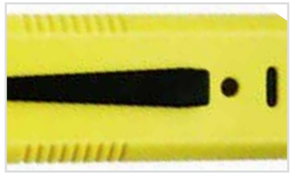

High-definition large screen display

The reading on the large screen is clearer and more intuitive, which is suitable for the needs of acid and alkali measurement in various industries.

LR44 button battery

The button battery is used for electricity, which is easy to replace and durable. Recalibration is required after replacing the battery.

Easy to use & Convenient to carry

Small in size, with a clip design on the back for easy portability

Specification

Model	PH-W2
Measuring Range	0.00~14.00pH
Measuring Resolution	0.01pH
Measuring Accuracy	±0.1pH
Matching Electrode	Fixed pH sensor
Automatic Temp. Compensation	0℃~50℃
Working Environment	0℃~50℃； RH≤95%
Battery	2×1.5V
Dimension	155×31×16mm
Net Weight	102g
